

Waste bin 60 litre stainless steel

Product sheet

There are days that waste seems to pile up. There is no end to the amount of tissues, food and waste. At those moments you want nothing more than a waste bin that can stand rough handling.

This double wall waste bin can handle contents of about 60 liters. That means plenty of room for a whole day, including peak times. Removing bags can be done efficiently by disconnecting the inner ring from the outer ring. Because the waste bin is provided with two wheels, the bin can be moved simply and easily.

Do you not want shortage of room at peak times? Ask now for the quote!
