

Waste bin open 9 litre

Product sheet

A toilet space well-looked after is a plus for every visitor. With the Qbic-line accessories it is very easy to bring your washroom to a higher level. This bin is a good example.

As an open bin, for 9 litres of waste, this is a modest size. But the designers aim high. This way, the plastic waste bag always remains out of sight, hidden under the removable top edge. The facility staff will soon discover that the stainless steel Qbic-line waste bin is even handy too. The full bags are, in fact, very quick to replace.

Curious about the possibilities for your project? Ask for a quotation!
